

Quick Programming Guide

Assigning a remote to a motor

Method 1: Apply power to the motor (motor will jog), press up and down together and release, press stop once (motor will jog if successful). Only works for the first remote assigned to motor

Method 2: Quickly tap (DO NOT HOLD) the button on motor (motor will jog), press up and down together and release, press stop once (motor will jog if successful). This method will work anytime.

Method 3: Power up motor (motor will jog), power down motor and wait 5 seconds and then power up again (motor will jog), repeat process 2 more times. On final power up (motor will jog) press up and down together and release, press stop once (motor will jog if successful)

Adding a second remote: Using first remote, press up and down together and release, press stop 8 times (motor will jog if successful), then using second remote, press up and down together and release, press stop once (motor will jog if successful). The extra remote (or channel) is now assigned.

Changing the motors direction

Method 1: Press up and down together and release, press stop 6 times, press down.

Method 2: Press and hold the button on the motor until the motor jogs

Set upper limit
